

# Kit **Learn & Practice**

Powered by

**itk offers a new service to always be as close as possible to its users and promote its solutions in the agricultural sphere.**

As an agri-intelligence company, itk designs innovative solutions for efficient and sustainable agriculture. Integrating knowledge from scientific research and field expertise, we offer Decision Support Tools (DST) for:

- ⇒ risk forecasting and management
- ⇒ farm management (crops, livestock)
- ⇒ strategic decision

With more than 1 million ha of crops covered worldwide, and more than 350,000 connected cows, we create links within agricultural chains and help bring producers and consumers closer together.
